

The New York State Pollution Prevention Institute (NYSP2I), in partnership with Rochester Midland Corporation, will be holding a workshop in Green Cleaning during the first quarter of 2009. In that workshop, the following subjects will be covered:

- » Overview of green cleaning and sustainability in facility management
- » Market trends
- » Green chemistry and impact on health, productivity, and environment
- » The relationship of green cleaning to LEED®
- » Certifying organizations
- » Available programs and resources
- » Results from implementation

For more information about this workshop, and to register, please call Ms. Erica Flores at 585.475.2512. This workshop will be wholly funded by the New York State Department of Environmental Conservation.
